

TANK SET con MIXING E LEVEL 400lt - all inox

ASS-TK1403-ME

- Accumulation station with stainless steel tank with satin finish and anti-sediment convex bottom.
- The integrated agitator allows homogenization of all fluid contents with a specialized axial-radial paddle.
- The integrated level detection device allows the percentage management of the incoming fluids for the "blending" to be prepared and subsequently to be dispensed to the process.
- Equipment essential characteristics:
 - AISI 316 stainless steel tank
 - Flanged top cover with inspectionable opening
 - incoming fluid multiple connections: n.2 G1" (F) + n.1 G1.½" (F)
 - Electric motor mixer with 4 inclined blades with special geometry
 - AISI 316 stainless steel level detector with facing ceramic membrane

DIMENSIONS MATERIALS AND POWER:

Tank product contact material: AISI 316 stainless steel
 Propeller mixer Specialized four-blade impeller dia. 300mm
 Mixer with Screw Reducer Kit SF 1,5 kw (20 – 70 rpm)
 Total tank dimensions: dia 730 mm x h. 1812mm
 Fluid quantity in the tank about 400 lt
 Mixing fluids: primers - water based / solvent based paints
 pure solvents - reactive - protective - release agent.

- Main options:

- Control unit for connection to level detector and on/off consents
- Pilot operated valves for process fluid replenishment
- Atex version available
- Available version for food sector (tank + mixer)
- Power station with pump and filters 237200-EM05Px

Dettaglio elica mixer
