

Mixing station for closed 200-liter drums

209015-EM13P

Pneumatic mixing station for closed 200-liter drums.

The Airmation station allows for the perfect mixing of products in closed drums with exclusive access from the top (standard G 2" cap connection). Pneumatic controls for managing the lifting and lowering phases and complete agitator control with drum presence safety device.

Equipment 209015-EM13P includes:

- PMRV015-V09 pneumatic agitator Stainless steel
- 210740 pneumatic elevator
- Transportable module for elevator

Essential features of equipment 209015-EM13P:

- Centralized compressed air connection: G 3/8" (F)
- Max motor power (@ 6 bar): 1,5 HP
- Coppia stallo: 5,6 Nm
- Motor supply air: 2 - 6 bar
- Pneumatic elevator stroke: 1100 mm
- Air consumption at max power: 1,3 m³/min
- Balanced propeller: speciale
- RPM (no load): 20 - 2000
- L/tot shaft (from flange plane): 855 mm

Optional

- Sensotronic level detection control unit
- Different power ratings
