

Rotomoto Drum Station

Suitable for mixing raw materials
or finished products prone
to separation in small drums
(drums with \varnothing max 596 mm and h 736 to 940 mm)

RMT50.02x

Rotomoto Drum Station

Suitable for mixing raw materials or finished products prone to separation in small drums

(drums with \varnothing max 596 mm and h 736 to 940 mm)

RMT50.02x

Main features

- Rotation structure on sturdy steel base
- Gear motor suitable for speeds from 1 to 90 rpm
- CE electrical panel with integrated inverter (rpm selection)
- Slow and continuous rotation option
- Dual simultaneous processing station
- Closing handwheels for drum adjustment and safety locking
- External protection accessible to the work area

Advantages

- Efficient fluid mixing
- Versatile rotation settings
- Work safety

NOTE

- Technical data sheet available on request
- Solutions available for drums from 30 to 440 kg (continuous rotation or set with stop for unloading station).
